About Me

Full Stack Web Developer with 8+ years of experience, specializing in turning ideas into end-to-end digital solutions. I have strong expertise in front-end development with Vue.js and React.js, as well as back-end development using PHP and Laravel, including designing and integrating APIs.

My experience spans industries such as FinTech, e-commerce, and SaaS, where I've built secure, scalable web applications and systems, while also crafting intuitive, user-friendly interfaces. I'm dedicated to delivering projects with precision and professionalism, focusing on creating high-quality digital products that meet — and exceed — expectations.

Education

B.Sc. Hons, Electronic Engineering (Telecommunication)

AI-Neelain University | 2005 - 2010

Activities and societies: Member of Sudan Engineering Council
